PROFESSIONAL AV SOLUTIONS

2017 EMEA Catalog

A MESSAGE FROM CHIEF

It's been an exciting year at Chief developing new solutions to enhance your experiences with technology. Our customers have generously shared their time and input to keep us innovating new ways to help with your AV needs.

The Fusion Modular Series is one example of this. We created the Modular Series to address requests from customers for non-traditional multi-display installations. The Fusion Modular Series uses common components of Fusion multi-display mounts and a new online configurator to give customers the ability to build and order the parts necessary to meet their exact application requirements. It's your vision, unlimited.

Fusion Dynamic Height Adjustable Mounts are ideal for interactive applications. Height adjustment creates better accessibility to interactive technology displays that are taking an ever-increasing role in digital signage. The height adjustable box allows up to 400 mm of vertical adjustment instantly – much faster than electric display mounts. This height adjustable solution is available in cart, floor supported and wall mounted options.

Other solutions, like white finish Kontour monitor mounts, smaller form Fusion mounts, digital signage solutions, and mounts for installing Microsoft® Surface Hub™ technology, were driven by requests and the fast-changing AV landscape. You keep telling us what you are seeing in the field, and we'll keep on making solutions to help.

Your input also helps us to continually improve the Milestone site, where you can find Projecta and Da-Lite solutions along with Chief. This means one account, one invoice and one website for all your information. Features include enhanced browsing with search and filtering options, product comparisons, drawings, photos, case studies and videos.

In the past year, Milestone also acquired Vaddio, a leading global manufacturer of PTZ cameras, professional AV solutions and a full suite of unified communication and collaboration products for the audiovisual, videoconference and broadcast markets. If you haven't already, be sure to contact your local sales representative for more information on these exciting solutions. More information on Vaddio can be found at www.vaddio.com.

As always, I hope that all the improvements and additions found in this catalogue will help you with your mounting & storage needs. And, if you have good ideas for us on how we can help you better – let us know.

MAKE IT MODULAR

Chief launched the Fusion Modular Series system and Multi-Display Configurator at InfoComm 2016, giving integrators the ability to design and build virtually any menu board setup. The system allows for menu board displays to be varying sizes and orientation, and even accommodates for custom spacing.

Now we've raised the bar even further. Our latest expansion of the Modular Series allows integrators to build and order ceiling-mounted video walls up to five rows tall and any width, all through milestone.com.

And that's not all:

- The tool is mobile-friendly and directly integrated with Chief's industry-leading MountFinder database
- Configuration URLs can be saved for future reference
- The Modular system maintains all the installation benefits of standard Fusion Menu Board and Video Wall mounts
- Fusion Modular is compatible with a suite of standard Fusion accessories
